DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action, when taken with the cancellation of the rejected claims as per the after-final amendment filed 4-21-06, is persuasive and, therefore, the finality of that action is withdrawn.

2. Claims 8-15 were pending at the time of the previous, final Office Action. Claims 8-12 have been cancelled by the latest amendment. Therefore Claims 13-15 remain pending and have been examined.

Information Disclosure Statement

3. The information disclosure statement filed 4-21-06 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. All US and Foreign Patent documents cited therein have been considered. The cited non-Patent literature documents have become separated from the file and could not be retrieved from any source, and therefore were not considered. If the applicant wishes these references to be considered they must be resubmitted.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

IN THE SPECIFICATION:

Under the Section heading: RELATED APPLICATIONS, lines 5-6 are amended to read:

This application is a continuation in part of U.S. Patent Application 09/180,377,
filed on November 3, 1998, now US Patent 6,609,196. International Application
PCT/US02/19628 is a continuation of this application.

Allowable Subject Matter

5. Claims 13-15 are allowed.
6. The following is an examiner's statement of reasons for allowance:

The closest prior art in the field, Landfield, US 5,632,011, and S. Kent, "Privacy Enhancements for Internet Electronic Mail, Part II: Certificate Based Key Management"; Network Working Group Request For Comments 1422, Feb. 1993, do not teach the combination of features found in the independent claim, including incorporation of a security manager that determines if a signature is required for a received e-mail message by applying a signature policy, where the policy includes rules to determine whether a signature is required by reference to attributes of the e-mail message, and where the security manager retrieves a signing certificate for the message by applying signature policy rules that identify the kind of signing certificate to retrieve by referencing attributes of the e-mail message, and subsequently applying the retrieved signing certificate to the message.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
